## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al.

Yamada et al discloses a recording/reproducing apparatus that shows all the limitations recited in claim 1, including the feature of having a plural set of image data recorded on a recording medium and thumbnail images of selected representative images being also recorded on the recording medium as specified in the present claims 1, 4, 7, and 10. (See Yamada et al's claim 49, last paragraph, section (ii), where it is disclosed thumbnail information including information pertaining to a plurality of representative images of the image files being recorded on the recording medium).

With regard to claims 2-3, 5-6, 8-9, the feature of selecting the representative image data based on predetermined data or degree of similarity of the set of image data as specified thereof would be inherently present in the cited reference of Yamada et al's apparatus. Because, the Yamada et al's reference discloses that the user has the capability of selecting representative data as desired as shown in Figures 2, and 3, of

Yamada et al. Therefore, the user can always look for similarity of the image data in selecting the representative image data as desired.

***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 10 is rejected under 35 U.S.C. 101 because the claim is directed to a recording medium storing nonfunctional descriptive material.

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical "things" nor statutory processes. See, e.g. Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. See MPEP 2106.IV.B.1.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haneda discloses an image apparatus which discloses the feature of representative image data.

Nagasaka et al discloses a video access method and video access apparatus.

Koichi (JP406225265) discloses a picture transmission apparatus.
